

F2P Network:Free-To-Play Blockchain Lineage 2 Servers

Abstract.F2P it's decentralized servers Lineage 2 for blockchain network, new tokens generation through gaming process, exchange with a zero commission, using nodes active players, **GOAL:** stable 10.000 nodes.

1. Introduction

Development of robotics will lead to loss of 80-90% of jobs for people in near future.

Subsequently, most people will live online, earn and use cryptocurrency to pay.

Propose to create new jobs now, merge two industries: gaming and blockchain, will give people opportunity to earn on cryptocurrency, playing games.This is beneficial to players and developers.

With development of virtual reality technology, MMORPG will become most popular game genre.

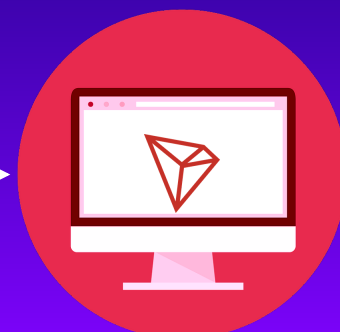

As implementation protocol and network deployment selected legendary game Lineage 2.

Technically perfect for integration web3.js, installing DApps,use game nodes for power network.

2. Blockchain

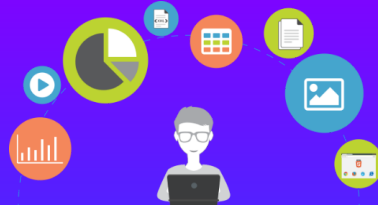

Deployment new tokens on blockchains: Ethereum, Qtum, Tron, with unique mining concepts. Opening servers on different blockchains, increase global number of nodes.

3. In-game Exchange

Exchange with a zero commission, due to the limited number of players on the server, 5000 maximum players on one server.

4. Mining

New tokens can only be obtained through the game: drops from mobs,raid bosses, fishing, reward for level up.

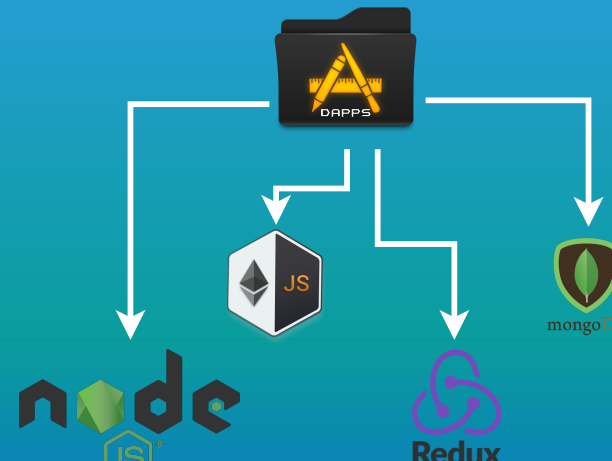

5. Economy Token

For token, you can buy valuable items in L2 STORE, a premium account for access to the exchange.

6. DApps

Decentralized applications using neural network for analysis and protection servers. Exchanger,DEX wallet.

7 Game Nodes

Node miner using network protocols. To use need premium account.

8 Cipher Airdrop

Get a tokens award, solve the riddle.
